bus
tumble dryer
Hot water
hair straightners
curling tongs

Lawn mower
TV
Play station
video player
central heating
strimmer
tractor
printer
scooter
photocopier
Chain saw
motorbike

Every time you use any of these things they produce a gas that we cannot see called **carbon Dioxide**. This gas is part of the reason our climate is changing **we need to use less energy , to stop our climate changing.**

What things in your hot air balloon do you think you could do without completely ? Colour in any of the spaces on your balloon if you feel you really don't need to be using these things at all !

What things could you use less of? colour in the things you could use less just by coloring with a few lines

to show that you will cut back on the amount you use it.

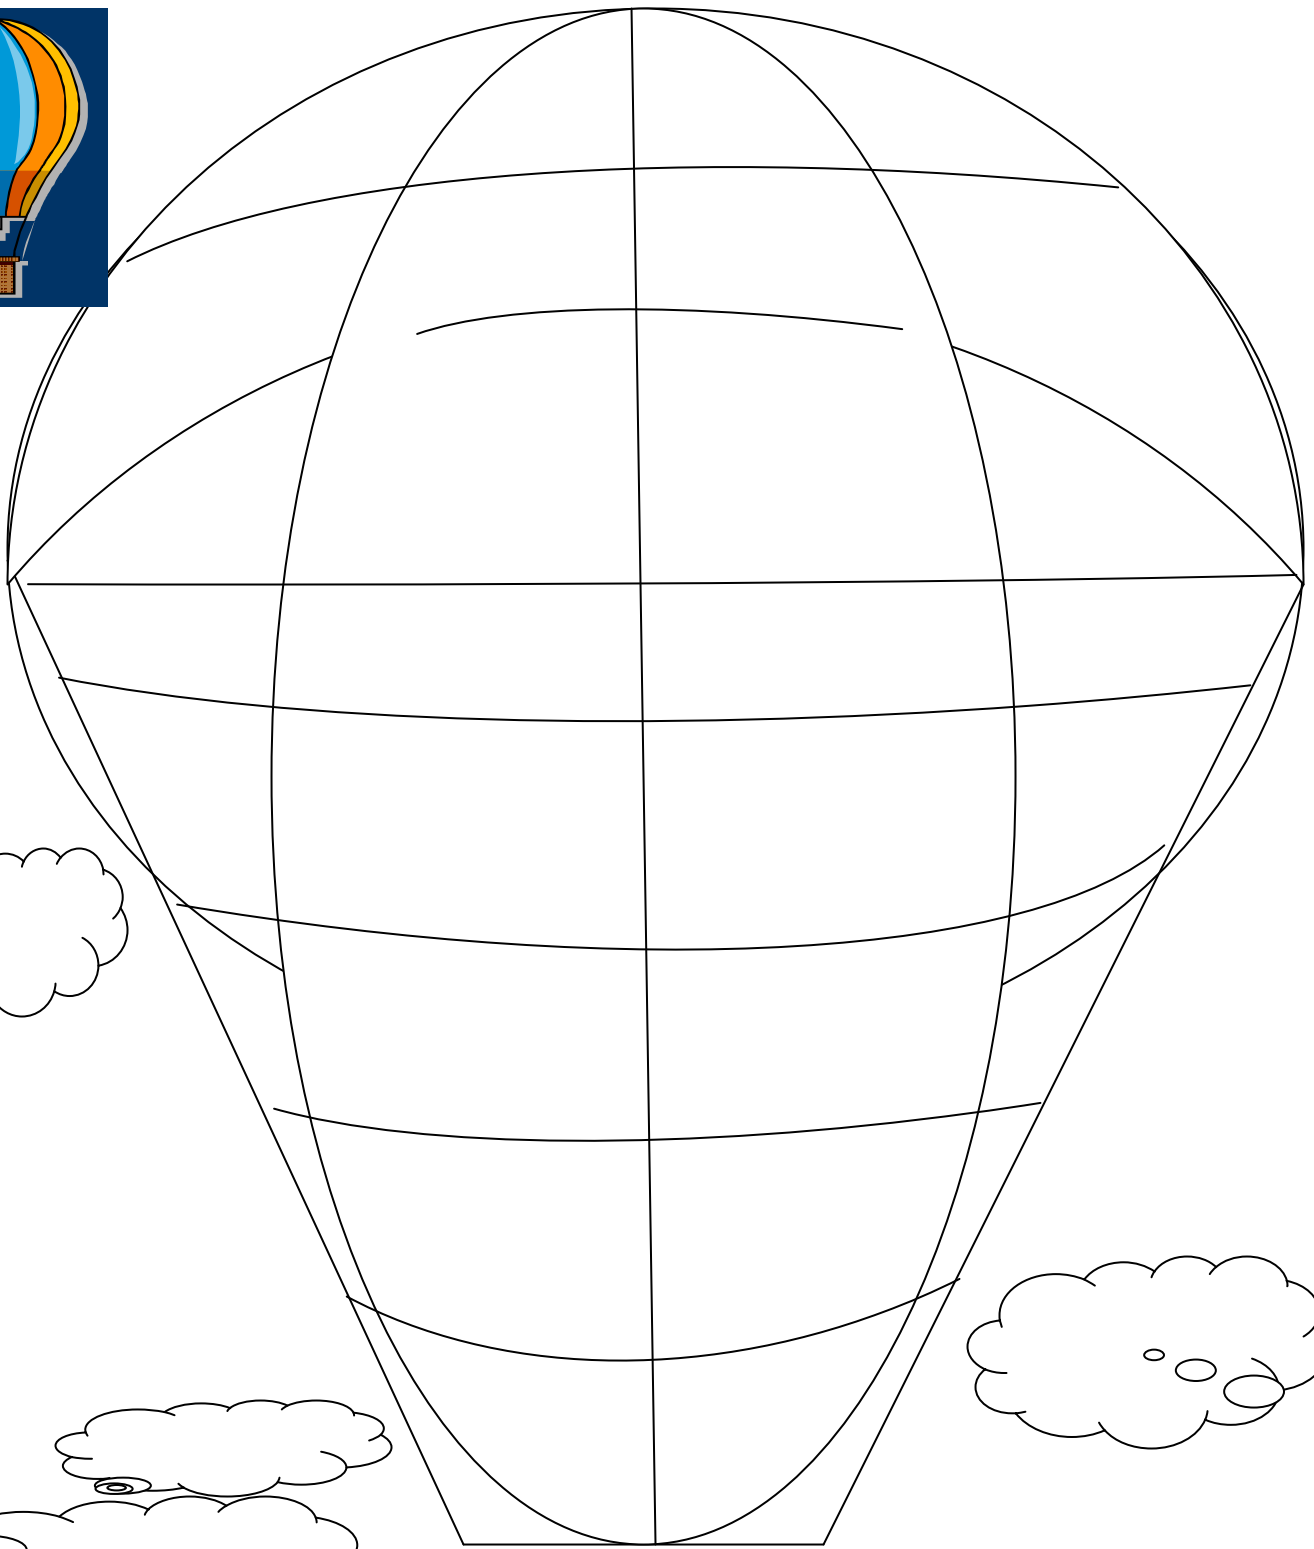

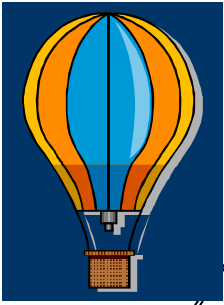

Because the climate is changing, more places in the world are now getting stronger storms and floods, others are getting droughts and famines. We all need good weather to live safely and to grow our food.

If we want to help people around the world, and to help the animals, the birds and the plants, we all need to use less electricity, oil, gas and petrol.

A global citizen ? Can you be a global citizen by trying to cut back on the things you use? Please let us know what you and your school are going to do to save energy.

.....

Write your name
here:

Your Carbon balloon each one of us makes about five hot air balloons of carbon gas each year when we use energy by burning things like oil, electricity, petrol, gas and diesel. In each of the boxes of the hot air balloon, can you write one thing that you and your family use that need gas, oil, electricity, petrol or diesel to make them work.. over the page are some ideas to help you
